e-manifesta.org

experience discussion critic opinion debate

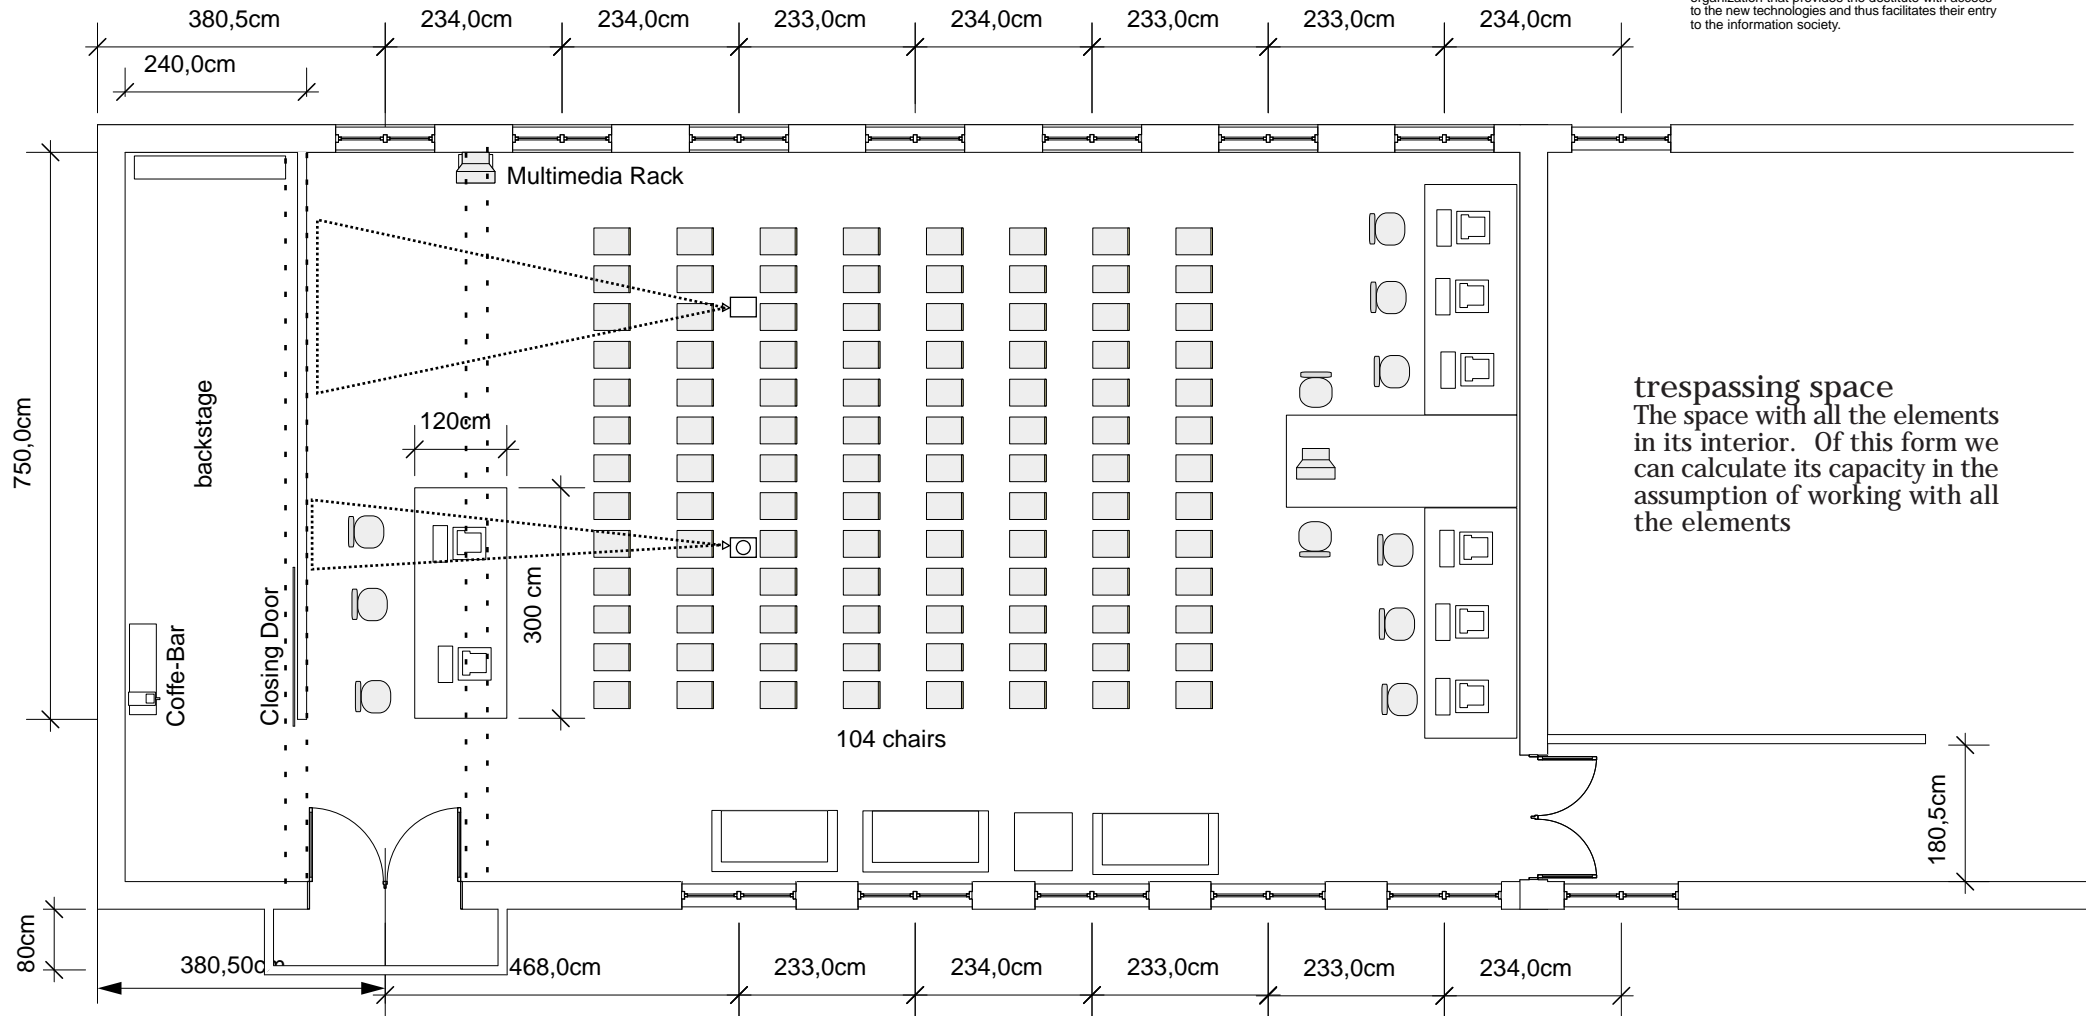

e-manifesta.org in an on-line/physical infrastructure that will provide a frame for reflection on several of the issues proposed by artists and curators and is in fact a contribution to the overall Manifesta-4 debate. Providing a first hand experience of manifesta discussion, critics and debate. Technologies To The People has always developed, supported and designed platforms for artists base on a strict sense of

independence. The chance to work again into an artistic event like Manifesta-4 is another example of the important work carried out by the Technologies To The People Foundation in order to showcase aspects of contemporary life.

Possible distributions

4Tables
We must create four tables that serve as modules for the different activities. The tables have to be constructed with a somewhat light wood. They are designed with form of divided box so that they leave two parts with autonomy and that they can carry in his interior, the computer, etc. The wheels will allow us to move them with facility.

manifesta-4 trespassing space

Walls paper cover

The walls will be covered by roll photocopy paper. They reproduce the php and other code of the pages of e-manifesta. We used a sufficiently neutral metaphorical argument on the idea of open code that it serves to give us entity to the space. The look will be very neutral to use it in every event. The paper roll are very cheap and easy to glue it on the walls (and is also removable if we need to do it later)

GNU GENERAL PUBLIC LICENSE Version 2, June 1991

Copyright (C) 1989, 1991 Free Software Foundation, Inc. 59 Temple Place, Suite 330, Boston, MA 02111-1307. USA Everyone is permitted to copy and distribute verbatim copies of this license document, but changing it is not allowed.

Preamble

The licenses for most software are designed to take away your freedom to share and change it. By contrast, the GNU General Public License is intended to guarantee your freedom to share and change free software—to make sure the software is free for all its users. This General Public License applies to most of the Free Software Foundation's software and to any other program whose authors commit to using it. (Some other Free Software Foundation software is covered by the GNU Library General Public License instead.) You can apply it to your programs, too.

When we speak of free software, we are referring to freedom, not price. Our General Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for this service if you wish), that you receive source code or can get it if you want it, that you can change the software or use pieces of it in new free programs; and that you know you can do these things.

To protect your rights, we need to make restrictions that forbid anyone to deny you these rights or to ask you to surrender the rights. These restrictions translate to certain responsibilities for you if you distribute copies of the software, or if you modify it.

For example, if you distribute copies of such a program, whether gratis or for a fee, you must give the recipients all the rights that you have. You must make sure that they, too, receive or can get the source code. And you must show them these terms so they know their rights.

We protect your rights with two steps: (1) copyright the software, and (2) offer you this license which gives you legal permission to copy, distribute and/or modify the software.

Also, for each author's protection and ours, we want to make certain that everyone understands that there is no warranty for this free software. If the software is modified by someone else and passed on, we want its recipients to know that what they have is not the original, so that any problems introduced by others will not reflect on the original authors' reputations.
